A ROYAL PRESEVE

VALUABLE GIFT TO QUEEN ALEXAN RA

A Vancouver dispatch dated December 11t says:-Chow Chow is a guest at the Hotel Vancouver. He is not an Oriental diplomat out here to investigate labour conditions. "Dog, all dog," best describes the visitora lie is a thoroughbred Chinese dog with an un ainted pedigree a thousand years old. Chow Chow is the Christmas gift of the Dowager I mpress of China to her Majesty, Queen Alex indra, the

spouse of King Edwar He arrived here yesterday in charge of Capt Hamer, of the Indian army, who crossed the Pacific on the Empress liner. Capt. Hamei was especially commissioned by the British Ambassador to: Chius to see that the dog was delivered in person at the Royal kennels at Sandringham, one of the King's country residences.

The noble canine-for such he isbelongs to the Chow Chow Class dogs, whose breeding is restricted to royalty and the mandarins. To obtain a perfect specimen the all-powerful Dowager sent her commands all over the empire. Of a hundred of the breed collected was the one which is now in Vancouver, because he was consider-Chow Chow occupies the finest quarters in the baggage room of the hotel. . He seems to have a sense of his innute superiority and disdainfully sniffs the air at the approach of visitors.

The dog was obtained in a remote province on the borders of Thibet. This means promotion and smoluments to the lucky governor. Chow Chow is only 14 months old. He has characteristics which will make him famous is England. In appearance he is not unlike small-sized "husky" dog. His hair is of a fox red with a mane just beginning to grow, but which at maturity will be quite leonine.

But his greatest peculiarity is his tongue. is of a coat black colour, the under surface being a deep purple. The markings of his tongue tell the story of his regal pedigree likewise the white hair on his under jaw ar throat. Dogs of this type are famous for the fighting qualities. Captain Hamer says they make mincement of a prize builded or bul terrier, but he does not intend to make an experiments.

Chow Chow made a great disturbance after landing at the wharf yesterday. He e-pied two curs, and before the porter realistd what had happened the Chinese dog dragged him ten feet before nipping the other dogs, which yelpingly took to their heels. Captain Hamer restored order.

He received his commission to look after Chow Chow a few weeks ago when passing through Peking en route to England. Queen Alexandra is a famous dog fancier. She has large kennels and is credited with knowing every dog by name.

CONSUMPTION IN CHICAGO.

Chicago, Dec. 16. .. The great white plague, which causes more than 3,500 deaths in Chicago every year, is to be attacked in a new and for this city novel

campaign. Special departments for tuberculosis were opened to-day at the free dispensaries conducted by the Rush, North-western, Polyclinic and Hahnemann medical schools, the College of Physicians and Surgeons and United Hebrew Charities Dispensary.

The medical institutions were interested as a result of the activity of the Chicago Tuberculosis Institute.

The institute has been in existence for three years, and during that period its work has been directed chiefly along educational lines. The alarming increase in the death rate from consumption in this city, which was 2 5 more last year than it was the previous year-due, according to Health Commissioner Evans, mainy to the lack of ventilation in dwellings-has caused the institute to adopt more vigorous methods in combating the disease.

The unfortunate victim of tuberculosis, no matter how poor he may be and regardless of the stage of the disease, will receive valuable 'advice regarding the out-of-door treatment, and diet and exercise and medicine when it is needed.

Physicians specially qualified to diagnose and treat tuberculosis have volunteered their services. The plan has the enthusiastic support of the medical profession, including the commissioner of health.

THE CANTON MEDICAL MIS. SIONARY SOCIETY.

THE SIXTY-WINTH ANNUAL MEETING.

The sixty-ninth annual general meeting of the Canton Medical Missionary Bociaty was held at Canton in the Club Theatre, Shameen, on Thursday, the 16th January, 1908.

There were present : Rev R. H. Graves, M.D., D.D., president (in the chair), Rev E. Z. Simmons, D.D., Dr R. C. Davesport, Dr J. Webb Anderson, Messis, T. D. Moothead, J. Stirling, C. S. Paget, Rev R. R. Chambers, Rev W. Dawson and about 45 members of the Society.

After the notice convening the meeting had been read the Rev Dr Greene opened the meeting with prayer.

The minutes of the last special meeting were read and approved.

REPORT OF THE MANAGING COMMITTER. The following report was presented by Dr Davesport, the secretary of the managing committee:-Your committee is glad to report that [144] the general working of the Hospital has been carried on to their satisfaction. The difficulties which have been met have been overcome, and some progress has been made. It notes with pleasure the increase among the women patients for the year, for 700 women have been registered as being in residence. This i the largest number yet reported in one year. In spite of the many changes in the teaching staff of the College, and the unfortunate breakdown in health of Dr. Anton Anderson and his enforced retirement from the staff, the work of the medical school has gone on without serious interruption. On the whole the students have. worked with commendable diligence. It would

be to the advantage of the school if permanent residences for students could be provided on the Society's ground. Visits of inspection have been made during the year, and buildings and grounds generally have been found in good order. It was noted, however, that the women's ward, the oldest building on the premises, was giving at one end and that the roof was unsafe. Your Committee was forced by these conditions to take immediate action, and after due and careful consideration decided to strengthen the walls, add a sorely needed third storey, and re-roof the entire building. This work is now well in hand, and is being well done. This has meant a sudden, heavy demand on the

Society's funds, but it is carnestly hoped that friends will, not allow the Society to be hampered in its valuable work by any scarcity of funds. During the past year the imperfections of the Society's Constitution, owing largely to the dual control of the foreign members of the staff, were emphasised, and it was deemed necessary to call' a special general meeting which was held on October 24th, to carry into effect the revised Constitution, and consequently overcome many difficulties and place the institution on a more stable basis under the control of the managing committee of the Society. An opportunity to

at Kowloon, whence delivery may be obtained [permanently engage the services of Mrs.]. lings as head nurse at the hospital has been Optional Cargo will be forwarded on unless improved, and definite arrangements have now been made by which Mrs. logs will be con- LADIES and GENTLEMEN FITTED with inected with the hospital. Doctors Todd and Boyd have been withdrawn from the hospital

byterian Mission. HOSPITAL REPORT. The annual report for the hospital was laid

on the table by Dr. Swan, who read the following "abstract of its contents:-The work of the hospital, which has been a large factor in impressing on the Chinese the character of Western beneficence and Christianity, has been continued without interruption the past year. Foreign medical work is undoubtedly still opening the way for a better understanding between the Chinese and the outer world, and the methods of western surgery are becoming increasingly popular. The attendance of patients has been large, notwithstanding many new centres established by foreign trained native, physicians. The following total statistics are

taken from the hospital records :--Out-patients (visits). In-patients. Surgical

operations 612 Women 7,826 1,033

The extraction of teeth and opening of small abcesses have not been included in the numberof surgical operations given as above. The latter part of the year it was found that one of the main hospital buildings required immediate and extensive repairs, including a new roof. It has stood for forty years without large additions or repairs. The managing committee authorised the work, including enlargement, being carried out at once, and this is being efficiently done under the supervision of in Life. Messrs. Purnell and Paget, architects. The building when complete will accommodate forty-four more bed; than it formerly held. Mrs. J. lngs has been added to the hospital staff and is at the head of the nursing department. She has, by her skilful work, contributed largely to the success of important surgical operations, and is a most valuable addition to our working force.

On the motion of Mr. Stanton, seconded by Dr. Simons, the report as read was adopted .-Contributed.

(he Hongkong Celegraph

HONGKONG, WEDNESDAY, JANUARY 22, 190 THE LEAUING PACIFIC PORT. Few who have not been watching the growth of Kobe as a shipping centre are likely to realise the progress that port has been making within the past few years. Ma Consul Bonar's report on the trade of Kobe and district, which includes Osaka and seven other special open ports, in 1906 furnishes a very clear conception of what may be expected of Kobe in the future, provided she advances as a port at the same rate as that which has attended her trade during the present decade. In fact the Consul holds that the Japanese Government and the Japanese commercial world have excellent grounds for believing that Kobe is destined to become the leading port of the Pacific. In support of this view the writer remarks that the foreign trade of the district amounted in 1905 to 48 per cent. of the total, or £40,636,863 out of £65,000,000 for the whole of Japan. But for purposes of comparison it may not be out of place to consider what its position is in relation to the foreign trade of other countries. Taking the year 1905 (the last available returns), when the trade in China had exceeded that of any previous year, being £,101,500,000, the tride of the Kobe Con sular district for the same period was over 140,000,000, being thus equal to two-fifths of that of the whole of China. The ports of Kobe and Osaka combined have in fact larger foreign trade than all the treaty ports of China combined, Shanghai excepted. Ir imports and exports from and to the Un ited Kingdom alone, the trade of Kobe and \$16.50 Osaka combined was equivalent in 1905 to 27 per cent. of the United Kingdom's import and export trade with the Empire of China But it is in the shipping returns that the report affords the most noteworthy indication | the application of the proposed loan. of the development that is being made by the go-ahead port in the North. In the year under review 2,768 vessels entered, the tonnage being 5,528,135, and that did not include the coastwise trade. The most striking feature was the increase in Japanese vessels and tonnage, which totalled 3,020 vessels of 3,874,234 tons, or practically 30 THE trial of the four men, who are charged per cent, of the total tonnage. The increase, with conspiring to defraud the Fo Sang Bank in a great measure, was due to the resumption by Japanese vessels of trade routes abandoned during the war, and, to a certain extent, to an, the Po Sang Bank, as previously reported in freads :expansion directly resulting from the war, and caused by the purchase and capture of ships. The increase in Japanese shipping account

for the decrease in shipping under the British German, and Norwegian flags experienced

supplied vessels to take the place of the

comparison of the trade in 1906 with that

of 1904.5 as a true criterion of the position,

holding the latter to cover an abnormal

period. As might have been expected,

greater proportion since 1903 than that un-

der foreign flags. Nevertheless, says the

Consul, it is satisfactory to observe that

British shipping shows an increase of over

250,000 tons on 1,455,000 tons in 1903, or

17 per cent.; Germany has added 175,000

tons, or 40, per cent.; Norway, 15,771 tons,

or nearly 28 per cent.; France, 70,442 tons

or 56 per cent.; and the United States,

338,379 tons, or 104 per cent., since the

same year. The table tends to remove the

unsatisfactory impression which at a first

glance one obtains of the position of British

shipping as recorded in the consular returns.

which shows a marked decline during the

last three years; 634 ships of 1,768,542 tons

were entered in 1996 as compared with 922

ships of 2,293,733 tons entered in 1905, the

figures for the former year being also less

than those for 1904. Judging, however,

from the customs returns, it is satisfactory

to note that there, was in reality an increase

from 1,454,843 tons in 1903 to ,1,709,957,

British tonnage, so far as Kobe is concerned.

practicelly the same average in roof as in attention.

THE annual report of the Hongkong-Land Investment and Agency Co., Ld., for 907, has been issued. The net profits for last year, including \$56,218.38 balance blought forward in the year under review, Japanese vessels from last account, after paying all charges. replacing those of the countries which had amount to \$420,94543. From this amount an interim dividend of \$3.50 per share has afready Japanese ships temporarily withdrawn. But, been paid. It is now proposed to pay a float after allowing for tonnage; so replaced, dividend of \$3.50 per share, and after writing there is still an increase in Japanese off directors' and auditor's fees there remains ; shipping of "some 650,000 tons in 1006 balance of \$36,915.47 to be carried forward to over 1903, the year before the war. the credit of a new profit and loss account. The Consul rightly refuses to accept the

HONGKONG DOCKS. AWARDED NEW CONTRACT. TY PORTUGUESE COVERNMENT.

For some time past our columns have contained, at regular intervals, the exclusive announcement of awards secured by the Hongkong and Whampoa Deck Co., Ltd., for the construction of new vessels for private firms "More recently we reported the negotiations with Admiral Li Chun for the building of a few light-draft cruisers for the West River Patrol Service, and we are to-day in a position to state authoritatively and definitely that Mr. Robe. Mitchell, the chief manager of the Dock Co., has brought to a successful issue the negotiations for a stram-tender for he Portuguesa Government.

For some time pust correspondence had been carried on between the Duck Co. and the Portuguese Consulate General in Hongkong in reference to an inquiry by the Timor Government at Dilly for a steam-tender to replace the old-Dilly bui't at the Kowloon shippard many years, ago. A tender was submitted which had to be reforred to the home Government in Lisbon. Approval of the specifications has now been received by Conselheiro A. G. Romano, Portuguesa Consul-General, And we understand that the contract for the building of a new Dilly has been awarded to the Hongkong Dock Co. the versel is to be of the following dimensions :- Length, \$12 ft, between perpendiculars; ext eme bread h 18 fc 6 in., and depth Japan has over-reached heiself in her desire, of hold oft. She will be built of teak. The contract price is about \$30,000. Mr. J. J. Leiris, Vice-Consul, proceeds to Macao tomorrow to confer with the harbour-master there, Capt. Dingo de Sa, as to certain details of the specification. On his leturn it is expected that an early start will be made with the building of the tender.

With the order from the American Government now completing at liunghom, and the award of this new contract by the Portuguese, besides the prospective cruisers for the Provindial authorities at Canton, it cannot be said that the Hongkong Dick Co. does not enjoy he fair share of patronage from the foreign Governments. All the more credit to one o the leading industries of the Colonys

> WEST RIVICK FATROL. CHINESE ARRANGEMENTS.

Wuchow, 10th January, 908. Admiral Li Chun-bas- now-completed his arr, ngements, for the "effective" patrol of the West River, and the various reaches between Wuchow and Samshui have been divided into sections, with one gunbout and a number of guardboats to each section. It remains to be seen how the new regime will work. Local opinion is pessimistic.

MACAO'S BOUNDABIES

AGITATION BY HEUNGSHAN

MILITARY DEMONSTRATION PROPOSED. A From Our Own Correspondent.]

Canton, at at January, 1908. The agitation over the question of the alleged Portuguese interference with and encroach ment on the Chinese territory at Wantsain the neighbourhood of Macao, is still being co tinued here and in the various parts of the province, owing to the action of the gentry of district of Heungshan in endeavouring to devise means to have Wantsai converted into a trade centre. The gentry have sent out circulars to that effect. The circulars contain some resolutions to be brought up for discussion and adoption, which are as follows: (1) That a Seli Government Association be initiated in lieung shan to discuss the best possible measures to be taken to wid the officials in securing the restoration of Wantsai. (2) That territory of Wantsai is to be reclaimed under Chinese official protection and that it be conveited into a trade cen re on the same in the district of unning. (3) That a regiment purposes. (4) That a Government gunboat the year was 1,401. In the former half of the

QUEBN'S COLLKGE. MOITURISTE DISTRIBUTION

The spacious hall of Queen's College—that premier seat of learning in the Colony-was crowded to-day on the occasion of the presentation of prizes to the successful scholars by his Excellency Sir Frederick Lugard, who was accompanied by her Ladyship and Mr. A J. Brackenbury, private secretary. Among those present were ;- Commodore

and Mrs. Stokes, Hon. Mr. E. A., Hewett, Mr. Ho Kom Tong, Mr. Choa Leep Chee, Mr. B. D C. Wolfe, Inspector of Schools, Bishop Lander, Archdeacon Bannister, Mr. A. G. Romano Consul-General for Portugal, and Mr. J. Lairis, Vica-consul, Ray, and Mrs. Pearce, Rev. Mr. F. T. Johnson, Rev. Mr. C. H. Hickling, Mr G. Piercy, Mr. and Mrs. Frank Browns, Brother Sylvester, Mrs. and Miss Shelton Hooper, Mrs. Baleson Wright, Mr. G. P. Lammert, Mr. and Mrs. Young Hee, Miss Harker, Mrs. Chalbam, Mr. and Mrs. Mooney, Mr. T. K.

Pealy, Mr. E. Ralphs, Mr. A. W. Grant, Mr.

Bertram Tanner, Mr. H. L. Garrett, Mr. A.

Crook and o hers. ANNUAL REPORT. Dr. Bateson Wright read his report as principles as the new mart of Kung, Yik Fou, follows:-During the year 907, 645 boys appied for admission, of whom 390 sectifed of three, hundred troops, he stationed in the seats. On the other hand 317 boys left in the various places in the territory for protection course of the year. The total attendance for be detached and stationed permanently in that year, the total attendances were reduced owing vicinity for service. .(5) That the Telegraph, to two causes, vis, the premature attempt to abolish Class VII. and the depletion of the Upper School in 19.6 on account of the abpormal number of boys obtaining situations in that year. The result is a reduction in the daily average attendance from 1,003 to 991. In the latter balf of the year, the numbers recovered their usual figures, and we have this mouth au exceptionally high attendance, 1,049, ie, 64 more than in January, 1907. There were 228 school-days, three being tost on the occasion of the commercial processions, when most schools in the Colony were closed as Ching:o masters and boys had relatives from the mainland whom they wished to entertain. ? he total gruis expenditure way 160,005, or \$4,863 more than in 19 6, the increase being due to the 2 rate for Exchange compensation ordered by the Secretary of State. The public paid one-half the years expenses of the College, and the conof each boy to the public was \$30.81. The statisics in this paragraph merely show a reversion

> to the conditions of 1905. The following changes on the staff took place during the year:--

3 April, Mr. Lai l'ui-yan appointed articled pupil teacher

30 April, Mr. Tsang Kun wa, clerk, resigned. i May, Mr. Wong Wai-shu appointed clerk 4 May, Mr. R. E. O. B rd, senior assistant master, went on leave

20 Saptember, Mr. B. Tanner returned from

The drainage of the entire premises has been relaid, and a new masters! latrine provided; The roofs of two class rooms have been repared, and the cubig content of the rooms considerably increased by the exposure of the raffers. It does not appear possible for the Public Works Department to effect: alterations of such magnitude in our short vacations, (onemonth each, in February and August), The consequent dislocation of school work is considerable, as we have no spare room, in o which to transfer the disturbed class. We are obliged to use the grand entrance lobby, which is entirely unsuited for educational purpose. In the case of classes of 60 boys, some two dozen have to be distributed among. others section which are thereby overcrowded. On the 13th of Beplember a panic occurred in the east wing of the College, two or three hundred boys rushing downstairs, on account of ... a cry in the streets that Queen's College, was ... falling. The origin of the scare-was, simple of property enough. A piece of plaster fell from the ceils and he ing in a class room, whereupon all the boys into that room bolled. The wind blew the dust into the adjoining room, where the boys mistake, ing it for smoke shouted "Fire !" and san. The people in the street added to the excitement. In five minutes order was restored and workresumed. It was discovered, however, that one boy, in plarm, for his own safety, bad jumped over the verandah, a d stance of 25 feet. He was conveyed to hospital and returned to school a month later To prevent the recurrence of such a panic, all plaster ceilings in classrooms at diverandahs sliculd be removed This is the more necessary when we remember. that these ceilings have been in siturfully twenty years and in many places are covered

with patches. The manual states in the very large very The health of the College has been very good, The chief, causes of, absence, from sicks ness were beri-berig from which Chipses ane cup site pear to recover with astopishing sease, and to scables, which often necessitates an absence server of two or three months from school. Dr. Iordan and Dr. Grone were appointed by the Government to report on the condition of the territor eyes of the pupils of the College, They dis they covered a very large propartion of the boys and the suffering from trachoma in various stages.

I am pleased to by able to report a very marked improvement in the success of ourcandidates at the Oxford Local Examinations, which were held last of uly for she twentieth time at this centre. The occasion was signalised by Mok Kai-fo kiss taking third classic junior bonours. This is the first time that a Queen's College boy has obtained honours.,. This year, I am happy to say, that all nursunlors with the took mathematics, passing cloy process in antimetic, gomiciae algebra, so passio, asometry dire and 9> p.c. in mensuration; also 4 out of 5 or 80 p.c. in trigonometry. All the preliminary took higher arithmetic and algebra, passing to a Soz,084.74 D. c in arithmetic, 78 in algebra and 56 in higher anthmetic. The mark good, pext-to as last year. Jeplor. / in Ecripture Junior.

\$1,519.47 distinction, was awarded to instead of it times 00,000,00 3 in arithmetic, I in Scriptore I is also bra, 17 in geometry and a in mensuration. Trelimits MATY & PATRICULA IN LABOR TO THE PERSON AND THE PER to the second of the second of

the annual examination for prizes and promotions, held by me under standing orders from the Governing Body, are as follows :---

Upper "School .. soy boys examined syg or 94 % passed

The two previous annual percentages of passes are 81 in 1906, and 88 in 1905. Table shows the percentage of passes in each subject. I have not the slightest hesitation in assessing the work of 19 7 as excellent. I have invariably found, the results of the Cxford Local Examinations to provide a safe criterion of the work to be expected in the Upper School and this year is no exception. It will always happer, in Oxford and all other examinations, that some particular questions may appear easier in one year than another. It is also worthy of notice that such apparently easy questions frequently act as pitfalls to the unwary. It may, however, | The great need of the College is a man who safely be promised, and I fear no considiction from my masters and boys, that the questions 84. I desire to invite particular attention of the Upper School in 1914 referred to above (par. 2). It was necessary for me in Septem. ber to form a fourth section of Class III. Mr. Tanner, on his return from England, took charge of this section, HID, which was composed of the boys in the various sections of Class IV, that obtained highest aggregates at my half-yearly examination in July Not a single boy failed and the general tone of the work was excellent, The promotion of boys from Class IV to III entailed promotions in all classes below. Reference in the figures in the preceding paragraph will show that while no class came reputation of being composed of dull, slow boys was observed by the class-masters and | posts, we do not find the better educated class' myself throughout the year to possess better of boys in the College electing education as a College at heart. (Applause). material than usual, and to be working in a profession. In the old days the fighest-boys satisfactory manner. The opinion thus formed in the first class were eager to be monitors at was amply justified the final result of the ex- | \$4 a month t now with \$10 to 35 a month we amination when 84 per cent, passed instead of have during the past eight years drawn our 55." Non-Chinese boys throughout the College | future masters from bare passes in Class I and have acquitted themselves above the average; the head-boy of VA is a Japanese and of VB a. Filipine. I have addressed the classes on the weak points observable in their papers through out the examination and therefore do not propose to dwell on matter , which, in view of the general excellence of the results, appear comparatively triding. For the first time in my experience the graphs in Classes I, II and III were excellently well done, and logarithms successfully employed by b ys in Class IA Mathematics generally and srithmatic in parti- mar, geography, composition and translations cular showed great improvement. The important subjects of English grammar, reading,

conversation; of dictation, composition and history, and the allied subjects of translitions w re of a high order of ment. The mapdrawing from memory in Classes III, IV., V and VI were astonishing feats. A few boys in 11 A drew the southern counties of England well; but the map of fieland proved too much for I.A.B. Hygiene was well taught to 736 boys, Mr. Sutherland being specially successful in teaching this subject to the boys of so

low a standard as Class V. With regard to special subjects, I find that the papers on physiology and natural science taught by Mr. Crouk to non-Chinese boys of the Upper School in lieu of translations, were better done than for many years past, notably so in the case of physiology. Trigonometry, taught by myrelf to a class that had dwindled down to 14 boys at time of examination, also had made progres, the seniors doing very well and the junious crediably. The Morrison scholar, Mok Kai-fook, florited every question on the senior paper losing few marks on matters of method. Model and freehand drawing taken by the second master, Mr. Dealy, to a larger class than usual gave evidence of talent College obtained situations: 9 in the H.K. Goand application. When I arrived in the Colony. 22nd of January, 1882, I immediately proceeded to hold the annual examination of the Central School, 367 boys 1.875 papers. This year I have examined 1,044 loys and personally corrected 8,888 payers. The fact that I mark all the spapers myself-is not in any sense whatever s reflection on my staff, whose ubility to hold examinations curefully is amply attested twice a year at the mid-term examinations. .. I am actuated by the very simple and to me excellent reason, the maintenance of one standard in appraising the excellence and intelligence o the answeis thiblighiul this large College. ... is not because 'I liv' any foolish claim to omniscience or to infallibility, but because Believe the gain to the whole College incalcul able, and the loss to the individual (in the event of a slip) infinitesimal. A very good Illustration of the wide divergence of views in assessing the same paper is afforded by the table of marks awarded by six masters (including myself) on the subject of composition in the first class. We none of us know the writer of a paper, [there is nothing but an index number provided for the occasion. The five Ts and all the boys in both sections of the class ate thrown into hopeless disorder, a ke bolog kept by headmaster. The marks awarded to one paper werd 52,70, 90, 90, 50, 6) and to aunther 70, 85, 96, 95, 64, 63. The following table may be of intirest; showing how the number of papers tinder review is arrived at: Class "F 72 boys 15 subjects 480 paper

0.260 Marked subjects of beys purpolarly .

Not Drawing. Special Subjects 114

Deduct E to C marks by second

Total marked by head-master 8,888 papers. We have a most excellent English staff. What is reered is for each master to specialise in some distinct branch. When I approached them by circular for the expression of their views in this direction, they showed a remark. History 30" able unanimity to their dealer to specialise on Geometry natural science: but as the Gaverning Body is opposed to the introduction of elementary Mensuration..... science into the carriculum, it behave the English masters to seek other channels for the General Intelligence vent of their energies. Mr. Grant has for Shakespeare years been practically mathematical master in Trigonometry Class I, also taking the subject of bookkeeping io Class II. I propose next month to make Bookkeeping Mr. Crook quasi professor of geography; a subject in which he has distinguished himself." will so devote himself to the subjects of English

increased the scale of salaries attached to these even from Class II. The Normal master, Mr. Ralphs, speaks very highly of the work done by the five pupil teachers in their five respective classes. My observation throughout the year. enables me to codorse that statement which is supported by the excellent results in Classes Vi and VII at the annual examination. On the other hand, the result of the pupil teachers' examination in a theoretical paper and in practical demonstration in front of a class, together with the subjects, arithmetic, dictation, gramfrom and into Chinese, can only be described

as a very qualified, success. Vernacular School. 7-7 boys were examined and 641 or 91 per cent. passed. 308 or 43 p.c. of the vernacular school are now in the highest class, Class 5. As only a dozen newly-admitted boys are fit for this class it is evident that great credit is due to the vernacular-masters ! for the high standard to which they have raised the native school in three years.

The Reading and Cricket Clubs flourish. 'Gymnastic instruction, under Bombardier Wade, R.G.A., is very successful to small squads of 17. making a total of 85. Our football team has distinguished itself this year, by winning the III K. Schools' Football League Shield, and fighting a well-contested game with the Empress of India Football team, winner of the Empress Competition Cup. Visits interchanged between the Q. C and Christian College (Canton) frotball teats are a distinctly new departure, as there is no precedent on record of a Chinese football team leaving the mainland to play upon foreign shores. Q. C. was too strong for them, but it is hoped that better

matches may take place in the future. During the year 1907, 93 boys from Queen's vernment service, 25 in local firms, 8 under the Chinese Government and 51, in various parts, of the Far East. The above figures represent only these boys whose career on leaving school are known to us. Many boys are employed in Government and other offices without our knowledge, and it is impossible to say how many of the 89 boys who did not return after vacations last year and were marked "Left,"

are so employed. . I have once again to express our most fervent sense of gratifude for the generosity of the public in supplementing the Government Grantiof \$200 for prizes. Without their aid we should be unable to provide 48 prizes for 24 English, and 15 prizes for 15 veroacular classes; while special prizes for history and composition and special translations would be hopelessly impossible. We have no space for their names here, but they are annually posted at the College entrance, and are published; in the Yellow Drugen, the monthly organ of the College. Queen's College is hindered in an ambitious upward course by the following considerations; It is a day-school, so that all attempts to teach English conversation are necessarily confined to schoolhours and no supervision can be given to preparation of work. Again fully onethird of the boys change annually, and this has always been the case from time inmemorial: 4:0 boys leaving and 40; new boys being admitted each year is a serious obstacle in the way of obtaining a large and efficient Oucen's College to know that it sent men into Men French Mail on the 2nd February. On upper school. In this connection it must be the world to assist in guiding the destinies of the grid they playe the Hongkoup Football chiered that there is no external system for China. finding the upper school of Queen's College visit to the Viceroy of Canton and he was the the United Services. He hoped they by the abolition of lower classes they are would accept his explanation that up to prizepromoted to the charge of higher classes, and | day he was, without exaggeration, fied to his in many instances it would appear that they office. (Applause). The speaker then welout worse than last year, three, IVB., VA., and | are hardly equal to the strain. " In this connec- | comed his Excellency to the College, adding VB, altained a much higher figure. Class IB | tion, it must be remembered that in spite of that he knew education formed an important that for many years has borne the unenviable like fact that the Government has very greatly part of his Excellency's policy and from his official correspondence he had made it quite clear that he had the best interest of Queen

> PIS EXCELLENCY'S SPEECH. When the applause had subsided, his Excellency, who had been a very careful istener to every word, Dr. Bateson Wright uttered, addressed the gathering. He said that t a Colony should be proud to maintain such an institution as Queen's College, which was the largest Anglo-Chinese school in the British Empire, and, he thought, the largest public school in the whole empire. He had lately, when at the prize-distribution at Ellis Kadoorie's School, referred to the status of public schools and had endeavoured to impress on the scholars the importance of that position. The boys of Queen's Collegea sch, of which had been established for forty years - his Excellency thought, knew what was meant by "public school" and also that infallible term, "Public School Form," He believe ed in school competition and hoped that would be mainteined in sport, as well as in work with other big schools in the Colony. There were two reports published during the year on Queen's College. C'ne was

by the independent body of examiners and the other by the headmaster. The report of the independent examiners was moderately sitisfactory According to this report English and translation were good. The results of the geography examination were not so good, whilst hydiene only produced fair results. The headmaster's report, he considered, eminently satisfactory. The average attendance this year was not quite so good as that of last year. but this could be accounted for by the fact that quite a number of scholars had left school, and others promoted to higher forms. This year 94 boys passed in the examination as against 82 for the previous year. His Excellency agreed with the headmaster about the value of having the whole of the examination papers examined by one person. This meant uniformity, and also that by Dr. Wright's long residence here the College secured the benefit of having one examiner year in and year out, whose statistics can be nothing but reliable. The College showed great progress in the Oxford Local Examination and he congratulated masters and boys on the success. This year Mak Kai-fuk took honours in the Junior Division of the Oxford Local Examination. This was the first time in the history of ed to the compound to witness some symnastic

Oucen's Gollege, with one exception, that a Chinese boy took such hon ours ... (Applause). That exception was one Chinese boy in St. f tephen's College. The headmaster, speaking generally, said that the work of the school was excellent, especially where mathematics was concerned. Sir Matthew Nathan when last at this College laid emphasis on this subject, for, he said at the time, Chica wanted engineers

for her numerous railway undertakings. Speaking of the Evening Continuation Classes, H.E. said they were not a portion of the school the A. Goy, Cameron Highlanders, in the first in Hongkong and the guardonts in Kwangsh but they were there to permit of boys continu. I round of the Hongkong Football Club Shield and it is reported that these vessels will be alling their studies after they had left school. They were opened last year at a cost of \$1,100. The game is to commence at 3 30 pure This and the Legislative Council had agreed to spend is owing to there being a Rugby match further a sum of \$8,000 this year on these classes. following, which is timed to start at 5 p.m. which were to be called the Technical Institute. ladies, and gentlemen present that they were acting parties in the work of the British Empire, not only in a lucating the children in Hongkong, but in educating them to diffuse their knowledge on the frontiers. "If at any time there was a call on your purse for the revenue of the Colony remember that a great part of it is for education," he said. In conclusion, he hoped some day that Hongkong would become the contre of western learning in the Far Rast, and he also hoped to see the time when students would come to Hongkong to take their degrees. Those days were very far off, but as long as he was in Hongkong he would do his best to further education. (Applause). He wished the boys a pleasant holiday and a happy New Year (Loud app'huse].

CANTON DAY BY DAY.

RAILWAY DIRECTORBHIP.

[From Our Own Correspondent,]

Canton, 21st January. It has already been reported that Mr. Lo Poshun had been elected, at the meeting of the board of directors of the Canton-Hankow Railway Company the other day, as vice-president of the Company in place of Mr. Wong Shin-ping, who resigned his post some time ago. Mr. Lo, however, at first declined to take up the appointment, an I did so only when the directors presented him for the third time the letter of appointment, yesterday. Now that he has consented, a telegram has been despatched

(Yachuanpu) confirming the election. - WEST RIVER PATROL. The Inspector-General of the Naval Forces of Kwangtung, H.E. Li Chun has now obtained, from the Canton high authorities, authority to build, in addition to the four light-draft cruisers that have already been ordered in Hongkong, another four light-draft steamlaunches and twenty odd guardboats to

to the Ministry of Communications and Posts

COMPENSATION. With reference to the fireman who was severely, injured in falling into the treuch laying down of the water mains, as reported yesterday, the Company has now paid a sum of money as compensation to the injured, man. The accident will be a warning to the Company, and it is to be hoped that there will be no obstructions to both pedestrians and others during the New Year holidays.

TRUTGRAPHIC FACILITIES, Telegraphic communications have now been installed between bere and the district of Yun Ping by the Chinese Telegraph Administration. " JUNKE" PIRATED.

It is now reported that, on the 12th instant, a number of junks carrying a large quantity of This leave again for the North on the follow, cloth from the interior to Paleban to be disposed of was pirated at Ying Shu Mel, near True Casion Football Club advise that they | Fatshan, vand goods to the value of pres Biolog Mate leves shak ph the brister

THE QUESTION OF SHIP SUBS DIES.

AGITATION IN THE UNITED STATES.

For the purpose of arousing enthusism and bringing every possible pressure to bear upon Congress in the interest of ship subsidy, the friends of a Government merchant marine gathered at Cleveland, Obio, on the 21st ult. on the occasion of a meeting of the Merchant Marine League.' Speeches were delivered by prominent Senators and 'ongressmen. Nearly, every State and large business interests

were represented. It is believed that the obtaining of the pending mail subsidy would establish the general subsidy principle, which eventually will result on, 27th it st. in the Government giving support to marine interests.

Ex-Governor Herrick presided and Trumas H. Newberry, Assistant Secretary of the Navy. spoke in favour of subsidies. Referring to s report of Admiral Dewcy in 1905, that on the basis of strength of twenty-five battleships the . Navy would require from the merchant marine in a serious war appreximately 100 yessels and many tugs, Mr. Newberry pointed out that the vessels, especially of the larger size, do not exist in sufficient numbers in the American mercantile marine. The present cruise of the United States battleship fleet, the speaker said, is giving sharp and unwelcome proof of this point. All of the coal required by the fleet, except a small portion conveyed by regular Navy colliers, had to be entrusted to foreign "tramp" steamers, because there were not enough American steamships available. even though President Roosevelt offered to pay American ships a rate of 50 per cent higher than that given to foreign vessels.

William S. Green of Massachusetts, chairman of the merchant marine committee in the House of Representatives, said: "There is a great sentiment against ship subsidy in the central Western States simply because the people of that district do not understand the question. This must be a lack of education. We will never obtain's merchant marine until the people drive Congress to action,"

W. E. Humphrey of Seattle, in an address upon " Why America is losing its Pacific and Oriental Trade," aroused the auditors to frequent applause... He explained what Congress was doing regarding a subsidy and what it is to do. He devoted most of his time to the condition upon the Parific Ocean. He said there were now only eight American merchantmen upon the Pacific Ocean, whereas about a year ago there were about fifteen, and in the nest future all will pass from the Pacific unless something is done by the Government.

"We have wasted our opportunities," he said, "and have wasted our time in talking about trade following the flag. Japan has taught us a valuable lesson. From practically every standpoint Japan's great victory over Russia in the late war was due to ship subsidy, Japan is gaining the mastery of the Pacific. I do not believe there will be war with Japan, and I will do all in my power to prevent it, but if it should come I want my country to be pre-

"We are willing to subsidite our rivers and harbours and our railways, but not our merchant marine upon the high seas. I do not believe the people of this country are content to spend \$100,000,000 a year in the building of a great. Navy without providing for an auxiliary fleet. What will it avail us to have scores of vessels if we cannot man them? We must have this auxiliary fleet of merchantman to not only draw our sailors from in time of need, but to attend our big fighting vessels. We cannot borrow vessels from other nations in time of wan. The best measure of peace is always to be ready for war."
